MIRAIT ONE Corporation

【MIRAIT ONE Corporation】**"A-" Rating Received from CDP in the Area of "Climate Change"**

MIRAIT ONE Corporation (head office: Koto-ku, Tokyo; President and Chief Executive Officer: Hidemune Sugahara; "MIRAIT ONE") is pleased to announce that, on December 10, it received an "A-(A minus)" rating as a company with outstanding initiatives and information disclosure in addressing "climate change" in the 2025 survey conducted by CDP¹, an international non-profit organization that manages a global environmental information disclosure system.

With the aim of realizing the MIRAIT ONE Group Vision 2030, the MIRAIT ONE Group has identified important issues (materialities) that it should tackle: "Create and protect an environmentally friendly society," "Create and protect a safe, secure, and prosperous society," "Create and protect a culture that respects and promotes diverse human resources," and "Create and protect a fair and transparent corporate group." By implementing initiatives on these issues, we promote ESG management to contribute to achieving the SDGs and realizing a sustainable society.

Going forward, the MIRAIT ONE Group will continue to make sincere efforts to solve social issues through its business activities, accelerate progress toward the realization of a sustainable society together with its stakeholders, and strive to enhance its corporate value over the medium to long term.

*1 CDP is a British non-governmental organization (NGO) established in 2000 that manages a global environmental information disclosure system and collects and analyzes environmental information obtained from companies around the world to evaluate their environmental initiatives on an 8-point scale from A to D-.

<About MIRAIT ONE Corporation>

Founded in 1946, MIRAIT ONE is a company engaged in building and maintaining various types of social infrastructure with a history spanning approximately 80 years. Based on the wealth of experience and technical expertise we have accumulated in the construction of telecommunications infrastructure, in recent years we have been creating and maintaining society's infrastructure in the energy and transportation fields. By leveraging our technologies in communications, electricity, architecture, civil engineering and other fields, we are working on urban and regional development that connects to the future, including implementing DX in communities and businesses and promoting the use of green energy. Based on our purpose of "co-creating an exciting future through challenges and technology," we aim to create new value that enriches people's lives and realize a sustainable society.
