

[MIRAIT ONE SYSTEMS Corporation]
Commencement of Sale of “ConRepo for Education (Standard Version)” Cloud-based Health Management System for Educational Institutions from October 17
Strengthening of student monitoring and consultation system through the introduction of ICT in the classroom

MIRAIT ONE SYSTEMS Corporation (head office: Minato-ku, Tokyo; President: Akihiko Tamura; “MIRAIT ONE SYSTEMS”), which is a group company of Major telecommunications construction company MIRAIT ONE Corporation (head office: Koto-ku, Tokyo; President and Chief Executive Officer: Toshiki Nakayama; “MIRAIT ONE”) will commence sales of the “ConRepo for Education (Standard Version)” cloud service for managing the mental and physical health of students and children on October 17, 2023.

MIRAIT ONE SYSTEMS has provided ConRepo (Condition Report) services to enterprises and local governments since 2020, which has enabled the rapid input, tallying and management of the data concerning the working conditions and health conditions for employees. Leveraging the track record established by providing a total service of watching over the health and safety of employees, including the “Daily Health Check” function, “Safety Confirmation” function and the “Noticing Mental Changes” function, the Company will commence sales of the “ConRepo for Education (Standard Version)” to educational institutions.

“ConRepo for Education (Standard Version)” is a service that enables students/children to perform self-checks of their mental and physical health, and teachers to monitor them, providing opportunities to notice things like “she appears to be feeling a little down” or “he might be troubled by something” and approach them from the school before they develop a serious mental or physical disorder. Students/children who have trouble consulting someone even when they want to can also easily contact a teacher or an outside organization through “ConRepo for Education (Standard Version)”.

Various surveys and class newsletters issued by the school can also be placed in “ConRepo for Education (Standard Version)”, which will lead to the reduction of paper use. It can also quickly tally survey results automatically, cutting out the workload needed for manual tallying and significantly reducing the work hours of teaching staff. There is no need to install a dedicated application, and

input operations can be performed on a smartphone, tablet or PC as long as a Web browser is available. Teaching staff can also easily track the health of students/children at the staffroom.

“ConRepo for Education” is listed in “[Attachment] List of health monitoring and educational consultation systems utilized in one device per one student” of the Ministry of Education, Culture, Sports, Science and Technology Notice entitled “Preventive Measures Against Student Suicide (Notice)” dated July 10, 2023. The importance of building systems utilizing ICT for quickly discovering and addressing issues in school settings is being discussed on a daily basis, and there is an increasing number of local governments and educational institutions requiring swift actions to implement work style reforms for teaching staff and discover poor mental and physical condition of students. MIRAIT ONE SYSTEMS will expand the ConRepo series not only to support companies aiming to achieve health & productivity management, but also support the mental and physical health of students/children and work style reforms for teaching staff.

<About MIRAIT ONE Corporation>

MIRAIT ONE Corporation was launched on July 1, 2022 through the integration of MIRAIT Holdings Corporation, MIRAIT Corporation, and MIRAIT Technologies Corporation.
